

# Temporary Traffic Management Training Handbook:

Opus International Consultants have produced this useful training handbook. In preparing the handbook we have tried to reference all key issues, including the IRG reviews published by NZTA, use plain language, and reference safe, typical practices. Suggested improvements and feedback are welcome.

**The handbook is available in minimum orders of ten (10) at a cost of \$25 + GST each for orders of 10 - 49 and \$20 + GST each for orders of over 50, from The Executive Officer, Opus International Consultants, Box 563, Blenheim. Ph (03) 520 9500, Fax (03) 520 9501, Email [sarah.nichol@opus.co.nz](mailto:sarah.nichol@opus.co.nz)**

The handbook provides a summary only of the key elements of the NZTA Code of Practice for Temporary Traffic Management (the Code). It is not intended to be used in place of nor supersede the Code and is made available on the basis that all users are conversant with the Code and hold current qualification as prescribed by the Code.

They must also comply with the requirements of:

- the Code
- the Manual of Traffic Signs and Markings
- Health and Safety in Employment Act and Regulations
- all legislation relevant to the works

We advise users to keep abreast of all revisions of the Code and relevant legislation, to comply with requirements of the particular Road Controlling Authority, and to exercise sound engineering judgement NZTA and Roading New Zealand have reviewed this publication and they endorse its use for training purposes. The contents have been checked and as at the time of publication it represents the philosophy and requirements of the COPTTM. However, the NZTA COPTTM document always takes precedent and the latest version should be referred to in full.
